

All-in-One Intelligent Security

# Firegate® 100 & 1000 Series Overview

No Hidden Fees • Never Been Compromised • ANA

**Complete** Your business is growing. At Wiresoft we get it. That's why we designed the Firegate Series to provide a complete enterprise all-in-one security solution. Firegate's modular platform is scalable and can grow as your business needs grow ... and we can do it for a fraction of enterprise pricing! Firegate provides comprehensive security including Firewall, SSL VPN, Content Filtering, Virus Protection, Spamwall, and 24/7 instantaneous updates and monitoring. Take a closer look at the Firegate Series ... it's impressive and it should be ... because at Wiresoft we don't believe in wasting anyone's time or money.

**Innovative** Firegate's proprietary technology includes ANA (Automated Network Administrator). ANA works silently in the background analyzing incoming traffic. ANA's adaptive intelligence also learns from other ANA platforms as well as performs preventative maintenance on all ANA platforms connected to the Internet. ANA continuously checks for virus signature updates and installs them instantaneously. Our technology also automatically delivers, installs and verifies new features to all platforms in addition to keeping all software up to date in real time.

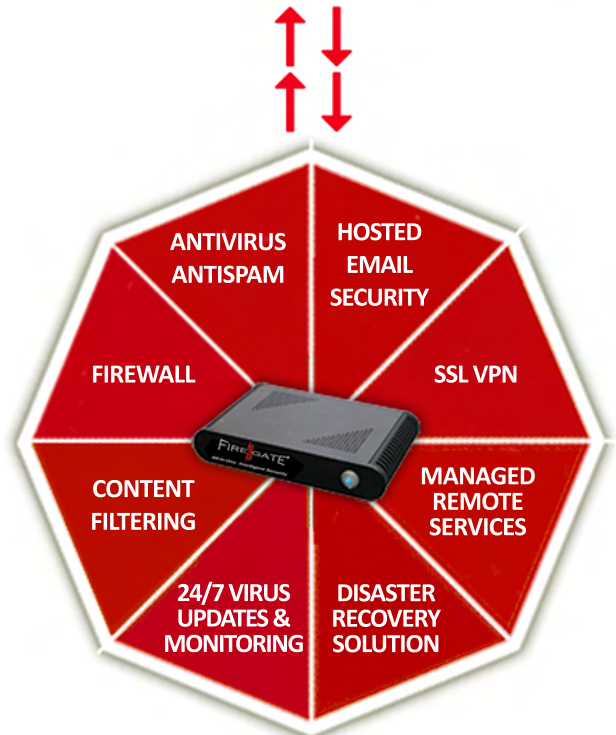

**Proven** Firegate's innovative and proven technology has never been compromised. Period. No virus has ever passed through our platform undetected. Our individually configurable Spamwall blocks 100% of unsolicited email while allowing 100% of "accepted" mail to reach its intended recipient. We believe Firegate is the best in class Unified Threat Management platform on the market today.

**Logical** In today's ever-changing network security landscape... your business and credibility are under constant attack, and you may not even know it....yet! Firegate protects your network from incoming security threats and provides peace of mind 24/7—allowing you to focus on the -bottom line and not worry about downtime.

Firegate: All-in-One...Intelligent...Security

## POWERFUL & INTELLIGENT MONITORING

I'm ANA Your Automated Network Administrator. I monitor your incoming & outgoing traffic 24/7. I am always watching & updating your system.

**ALL-IN-ONE SECURITY PLATFORM**  
Hardware, Software, & Managed Services

## Firegate 100

Firewall throughput	380+ Mb/s	Encryption Algorithms	DES, 3DES, Blowfish, CAST128,
VPN Performance	30 Mb/s		AES(128,256)
Platform Storage	80 GB	Authentication Algorithms	MD5, SHA-1
Max Recommended Users	100	IKE support	Yes
Concurrent Sessions	10,000 default (Configurable)	Peer Authentication	Pre-shared key, Certificate
New Sessions/Second	Configurable Firewall Per Rule Basis	PPTP	Yes
Firewall Rules/Policies	Configurable	SSL VPN	Yes
Interfaces	3 Gigabit Ethernet	Web based UI	Yes
Form factor	small desktop unit	SSL support	Yes
User Licenses	Unlimited	Role-Based Administration	individual management per user
Bridging mode	Yes	Configuration Wizard	Yes
Router mode	Yes	NTP Support	Yes
Firewall Rule Schedule	Yes	RIP	Yes
Content Filtering	Yes	WAN Failover	Yes
URL Filtering	Yes	DDNS Support	Yes
HTTP Content Block	Yes	PPPoE	Yes
File Extension Filtering	Yes	WAN Failover	Yes
Email Filtering	SMTP, POP3	Outbound (WAN) Load Balancing	Yes
Spam Filtering	Challenge-Response, Bayesian, Fingerprint, Block/Allow lists, RBL, Auto-Learning, SMTP callback, DNS checks	Inbound (LAN/Server) Load Balancing	Yes
Anti-Virus	ClamAV	Priority Queues	8 default/unlimited
Auto Update	Yes	Maximum Bandwidth Limiting	Yes
Supported Protocols	SMTP, POP3, HTTP, FTP	DNS Support	Yes
Concurrent VPN Tunnels	limited only by bandwidth	Internal DNS Overrides	Yes
		Leasing Options	Yes
		Captive Portal	Yes

## Firegate 1000

Firewall throughput	900 + Mb/s	Encryption Algorithms	DES, 3DES, Blowfish, CAST128,
VPN Performance	200 + Mb/s		AES(128,256)
Platform Storage	2 x 500GB Mirrored/Raid	Authentication Algorithms	MD5, SHA-1
Max Recommended Users	up to 1,000	IKE support	Yes
Concurrent Sessions	100,000 default (Configurable)	Peer Authentication	Pre-shared key, Certificate
New Sessions/Second	Configurable Firewall Per Rule Basis	PPTP	Yes
Firewall Rules/Policies	Configurable	SSL VPN	Yes
Interfaces	4 Gigabit Ethernet	Web based UI	Yes
Form factor	Desktop / Rack	SSL support	Yes
User Licenses	Unlimited	Role-Based Administration	individual management per user
Bridging mode	Yes	Configuration Wizard	Yes
Router mode	Yes	NTP Support	Yes
Firewall Rule Schedule	Yes	RIP	Yes
Content Filtering	Yes	WAN Failover	Yes
URL Filtering	Yes	DDNS Support	Yes
HTTP Content Block	Yes	PPPoE	Yes
File Extension Filtering	Yes	WAN Failover	Yes
Email Filtering	SMTP, POP3	Outbound (WAN) Load Balancing	Yes
Spam Filtering	Challenge-Response, Bayesian, Fingerprint, Block/Allow lists, RBL, Auto-Learning, SMTP callback, DNS checks	Inbound (LAN/Server) Load Balancing	Yes
Anti-virus	ClamAV	Priority Queues	Unlimited
Auto update	Yes	Maximum Bandwidth Limiting	Yes
Supported Protocols	SMTP, POP3, HTTP, FTP	DNS Support	Yes
Concurrent VPN Tunnels	limited only by bandwidth	Internal DNS Overrides	Yes
		Leasing Options	Yes
		Captive Portal	Yes
